

HR Services

Our organisation has been offering professional, complex HR services to large corporate clients since 2006.

The many years of operation proved that the activities performed within the service resulted in cost reduction, more effective operation and more predictable conditions to our clients.

Our Company relies on an electronic workflow system (SAP HR CRM) to support its activities, with the help of which we are able to manage and retrieve approximately 700,000 cases each year. Our partners are also granted access to the workflow system, which makes our services transparent also to our clients.

Maximum security for our clients' data, accurate HR administration, wage accounting, declaration, settlement and innovative, business value increasing, cost effective solutions to our clients - these are our most important values set to ourselves and our employees.

If you wish to receive more detailed information about our services, do not hesitate to contact us:

Ágnes Burián

Executive Director for HR Services
